(Justin Audet & Natalie Chartier)

2^e position : Ferme Alizée (Francis Boucher & Geneviève Castonguay)

3^e position : CDBQ (Marie-Claude Litalien, gérante)

Well Done!

Congratulations are in order for ISBONA Board Director Justin Audet and Natalie Chartier (a former ISBONA Director) and their Icelandic sheep flock at Le Biscornu in Quebec Canada. They are the smiling shepherds (middle) holding their First Place award.

The award given by the Genovis program recognizes Le Biscornu as having the best Canadian flock for Maternal Breeds in Quebec province. Sheep and flocks are evaluated according to Genovis' genetic evaluation system and must demonstrate high values on their respective indices. You can read more about GenOvis and its evaluation program on their [website](#).

Maternal breeds for Canada include Border Cheviot, North County Cheviot, Border Leicester, Dorset, DLS (a Canadian breed using Dorset, Leicester and Suffolk), Polypay, Katahdin, and Icelandic.
